The Bachelor of Technology in Technology Management (BTech-TM) is dedicated to removing barriers and broadening the access to programs at NAIT. NAIT recognizes that knowledge and skills are gained through a variety of processes including life and work experiences that may align with courses within our programs. We are committed to supporting a community in which learners will receive appropriate credit or recognition for prior learning.

Why consider a PLAR assessment?

Recognition of Prior Learning (RPL) refers to the combination of flexible ways of evaluating peoples' lifelong learning, both formal and informal against a set of established standards. You can receive academic credit for your relevant lifelong learning. The Bachelor of Technology in Technology Management (BTech-TM) program recognizes prior learning in a number of ways.

We recognize:

- Previous formal learning from a recognized post-secondary institution through transfer of credit and credential recognition.
- Previous non-formal and in-formal learning through a comprehensive prior learning assessment and recognition process (PLAR).

What are the PLAR options?

To be eligible for PLAR, a candidate must have first applied and have been formally accepted to a NAIT credit program (the non-refundable tuition deposit has been paid). Open Studies students are **not** eligible to apply for PLAR. Please note that your PLAR request will be reviewed within 6 weeks of receipt of the application form, all supporting documents (in English) and verification of fee payment. Submit your PLAR request early!

Individual Course Challenge

If you have five years successful experience as a technician in an engineering technology, applied science, or health field, and have learned the skills and knowledge for **one or more** of the BTech-TM courses, you may apply to be assessed for each applicable course. Please note that NAIT has a 50% residency criterion. Applicants can only receive credit for up to 50% of any NAIT credit program (See NAIT Academic Regulations and Procedures under **Residence Requirements**). Students should enrol in their courses until official confirmation has been received that credit was granted.

Fees:

- The PLAR evaluation fee is \$150.00 per course challenge.
- The course assessment fees must be paid prior to submitting a PLAR request.
- All fees are non-refundable.
- Call NAIT and ask to speak to an Advising Centre Representative at 780-471-6248 or Toll Free at 1-877-333-6248 or AskNAIT@nait.ca

How many courses can be challenged through PLAR in the BTech-TM program?

Currently we have 4 out of 49 third and fourth year degree courses with PLAR challenges available. Credit is granted per course – partial credit will not be granted. Please note that NAIT has a 50% residency criterion. Applicants can only receive credit for up to 50% of any NAIT credit program. (See NAIT Academic Regulations and Procedures under Residence Requirements)

Is PLAR available at any time of the year?

Contact the program at (780) 378-5983 or btech@nait.ca for more details. Your request will be reviewed within 6 weeks of receipt of the request form, all supporting documents (in English) and verification of fee payment. Submit your PLAR request early!

Please Note: You should enrol in your courses until official confirmation has been received that credit was granted. The program sends an email notification that the application has been processed.

It is the student's responsibility to:

- -Contact the program area with any questions or concerns related to the assessment results. Appeal process available.
- -Notify the program if they have decided to decline a course credit that has been granted. Any changes must be requested before the <u>add/drop deadline</u>.

Is it easier to challenge a course through PLAR - OR - take the course?

Neither is easier. By using PLAR you may reduce the repetition of studying information that you already know. The PLAR process allows you to demonstrate knowledge you already have.

PLAR is not an easy way to certification, rather a "different" way to obtain certification. Your personal level of skill and experience will dictate which courses you choose to challenge. The self-audit section found later in this guide will help you to decide if you have a good match of skill and knowledge for a specific course.

Methods of assessing prior learning

Assessment methods measure an individual's learning against course learning outcomes. The assessment methods listed below are the ones most commonly used, but other forms of flexible assessment may be considered. These assessments may include one or a combination of the following assessment tools:

- Product validation and assessment
- Challenge exam
- Standardized tests
- Performance evaluations (including skill demonstrations, role plays, clinical applications, case studies)
- Interviews and oral exams
- Equivalency (evaluations of learning from non-credit training providers)
- Evidence or personal documentation files (providing evidence of learning from life and work experiences and accomplishments)

If I live out of town, do I have to travel to the NAIT main campus to do PLAR?

Depending on the mode of assessment, there may be times that you will need to meet with the program on campus. However, we will try to keep travel to a minimum.

What services or resources can I access if I have a disability?

Identify any possible needs related to your disability during your PLAR Audit meeting with the program. If you have a disability and want to know more about what services or resources you may be able to access for your PLAR assessment, please contact <u>Services for Students with Disabilities</u>.

Are there other methods to gain NAIT course credits for prior learning?

Transfer Credit and Credential Recognition

Yes, NAIT may grant credit for previous post-secondary training from a recognized institution that is similar in content, objectives, and evaluation standards to NAIT training. Transfer of credit is different from the PLAR process. Transfer credit and credential recognition guidelines may be found at: http://www.nait.ca/86612.htm

Please Note: This process should be completed prior to your PLAR challenge. If these credits cannot be used for transfer credit or credential recognition, you may be able to use these accredited courses as part of your evidence for your PLAR challenge.

If more information is required, please contact:

- A NAIT Academic Advising Centre Representative at 780-471-6248 (Toll Free: 1-877-333-6248)
 or email AskNAIT@nait.ca
- Program Advanced Credit contact (www.nait.ca under programs & courses and contacts)

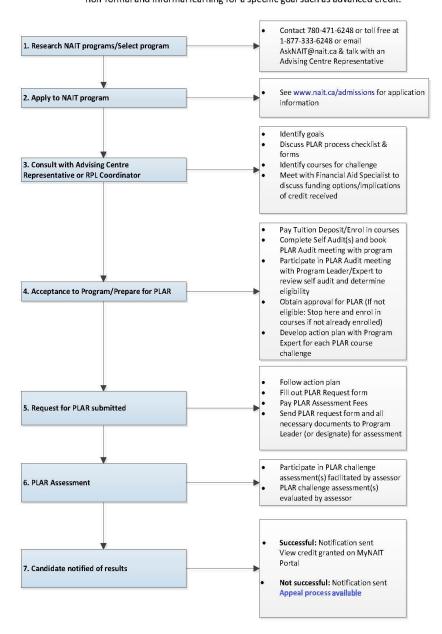

What are the implications of receiving PLAR or Transfer Credit for my full time student status?

While RPL can mean fewer classes to take and pay for, students should be aware that the definition of full-time status for Financial Aid may be different than NAIT's definition of full-time status. Questions regarding financial assistance should be directed to the NAIT Financial Aid Office. A student who qualifies for advanced credit should review the NAIT Academic Regulations and Procedures, Academic Honors and if necessary, seek further consultation with Advising or Program staff since eligibility for semester honors, Dean's Honor Roll, an honors diploma/certificate or awards may be affected.

Prior Learning Assessment & Recognition (PLAR) Process

PLAR is the process of identifying, assessing, and recognizing skills and knowledge acquired through non-formal and informal learning for a specific goal such as advanced credit.

Revised January 5, 2015

Guiding principles for developing a PLAR evidence file

- As you begin the PLAR process you will be advised if any evidence is required. This will be identified
 in your action plan. Check with the PLAR designated contact (see program home page Advanced
 Credit Contact) for your program before you begin to gather evidence.
- 2. Evidence must be valid and relevant. Your evidence must match the learning outcomes identified for each course.
 - It is your responsibility to create, collect and compile relevant evidence if required.
- 3. Learning must be current (i.e. within the last 10 years).
- 4. The evidence should demonstrate the skills and knowledge from your experiences.
- 5. The learning must have both a theoretical and practical component.

Types of evidence

There are three types of evidence used to support your PLAR request:

- 1. Direct evidence what you can demonstrate for yourself.
- 2. Indirect evidence what others say or observe about you.
- 3. Self-evidence what you say about your knowledge and experience.

Ensure that you provide full evidence to your BTech-TM PLAR assessor so that your prior learning application is assessed appropriately. Well organized, easy to track evidence will also ensure that none of the evidence is missed or assessed incorrectly.

Here are some examples of evidence that you may be requested to submit as part of your evidence file (if required):

- written descriptions and analysis
- experience (activity) outlines
- workplace validations
- work samples

All documents that are submitted to NAIT may be returned to the student after the final results have been given and the advanced credit appeal deadline of 10 days has passed. A copy of transcripts and certificates may be included in your evidence file, but original transcripts that were submitted at the time of application to NAIT will be available online. Be prepared to show original parchments at the PLAR audit meeting for validation.

How long will it take to prepare evidence for PLAR?

Since the requirements are different for each course, and each candidate has different experiences, the amount of time it takes to prepare your evidence will vary.

Steps to complete a self-audit

1. Read through the levels of competence as listed below.

Mastery: I am able to demonstrate the learning outcome well enough to

teach it to someone else.

Competent: I can work independently to apply the learning outcome.

Functional: I need some assistance in using the outcome.

Learning: I am developing skills and knowledge for this area.

None: I have no experience with the outcome.

Learning outcomes

For each learning outcome listed, please self-evaluate your competency levels and record in the appropriate column for each self-audit.

- 2. Take a few minutes and read through the following self-audit for each course you are interested in as a PLAR candidate.
- 3. Check your level of competence as you read through each of the learning outcomes for each course. The information will help you in your decision to continue with your PLAR application.
- 4. In order to be successful in a PLAR assessment, your abilities must be at the competent or mastery level for the majority of the learning outcomes (at least 80%). Some things to consider when determining your level of competence are:
 - How do I currently use this outcome?
 - What previous training have I had in this outcome: workshops, courses, on-the-job?
 - What personal development or volunteer experience do I have in this area?

Be prepared to explain the reason you chose this level if asked by an assessor.

 Bring the completed self-audit to a consultation meeting with the program head or faculty member in Step 4 – of *The PLAR Process* for prior learning assessment. Select <u>Program Advanced Credit</u> Contact (PLAR) to book consultation.

Self-audit Guide(s)

ETHC3200 - Ethics and Society

Ethics and Society supports degree requirements through its high-level focus on personal, social, business, environmental, and international ethics in preparation for students' professional careers. Students prepare to face ethical dilemmas by developing a personal code of ethics based on extensive reading and consideration of the works of acknowledged experts in the field from the past to the present.

PLAR assessment methods

If you qualify for PLAR, you may be asked to demonstrate your learning in one or more of the following ways. Be prepared to discuss the expectations during a consultation meeting.

1. Challenge exam

Requirements for challenge exam

The PLAR candidate will successfully complete (70% or >) a challenge exam assessing learning outcomes 1, 3, and 4. The exam consists of three written response questions (500 – 750 words each) with a choice of topics presented for questions two and three.

The PLAR candidate is allowed two (2) hours to complete the exam.

The assessor is to determine the date, time, and location of the exam.

BTTM3500 - System Analysis & Design

This course presents the concepts, skills, and techniques needed to become an effective systems analyst. The course emphasizes hands-on experiential learning and employs the systems development life cycle model as a tool to provide conceptual and systematic frameworks. The systems development environment is covered as well as software sources, systems planning and selection, systems projects, the determination of systems requirements, and designs and implementation.

Credit unit(s): 3

Equivalent course(s): N/A Prerequisite(s): None

BTTM3500 -	System Analysis & Design

4. Le	ad the implementation of information systems.					
•	Discuss the sub-processes that make up system implementation.					
•	Distinguish between system installation strategies.					
-	Prepare a training plan for an information system and demonstrate the many different modes available for training users.					
•	Discuss the value of systems documentation.					

PLAR assessment methods

If you qualify for PLAR, you may be asked to demonstrate your learning in one or more of the following ways. Be prepared to discuss the expectations during a consultation meeting.

1. Challenge exam

The PLAR candidate will successfully complete (70% or >) a challenge exam assessing learning outcomes 1, 2, 3, and 4. The exam consists of three sections: Section A) 40 multiple choice questions; Section B) three short answer questions; and Section C) practical assignment.

The PLAR candidate is allowed two and a half (2.5) hours to complete the exam.

The assessor is to determine the date, time, and location of the exam.

PMGT3420 - Project Management

This course consists of a disciplined study of the essential components of project management. The leadership and interpersonal skills required to gain team trust and respect and to ensure projects are completed on time, within budget, and to the satisfaction of stakeholders will be discussed. The project management skills required to initiate, plan, manage, monitor and control, and close the project are also important components of the course.

Credit unit(s): 3

Equivalent course(s): N/A Prerequisite(s): None

	Project Management					
Mastery:	I am able to demonstrate it well enough to teach it to someone else.					
Competent:	I can work independently to apply the outcome.		Ę	<u>a</u>		
Functional:	I need some assistance in using the outcome.	7	Competent	Functional	Learning	
Learning:	I am developing skills and knowledge for this area.	Mastery	m du	r T	arn	None
None:	I have no experience with the outcome.	Ma	ပိ	Ī	Le	ž
	emonstrate an understanding of the five project management ocesses.					
•	Initiate the project; identify sponsor and sponsor's needs.					
•	Plan and develop the activity work packages and tasks within the five main process groups.					
•	Manage the project prior to the deadline set in the course.					
•	Monitor the progress of the project and provide update to stakeholders.					
•	Control project and correct if necessary, items such as scope, time & cost.					
•	Assess change requests to the project scope while limiting scope creep.					
•	Lead and manage the project closure, such as lessons learned, historical archiving, and sponsor's sign-off of the project.					
	oply the ten Project Management Body of Knowledge areas in am service projects.					
•	Develop and manage an integrated project management plan, including the nine subsidiary project management plans for the identified social service project.					
•	Assess a project through group discussion, brain-storming, or a project selection methodology.					
•	Identify a potential project and gain project approval from the guidance team.					
•	Assess and interpret group dynamics and personal interaction/reaction within the team.					
•	Demonstrate the ability to work in teams while carrying out a service project.

PLAR assessment methods

If you qualify for PLAR, you may be asked to demonstrate your learning in one or more of the following ways. Be prepared to discuss the expectations during a consultation meeting.

1. Challenge exam

Requirements for challenge exam

The PLAR candidate will successfully complete (70% or >) a challenge exam assessing learning outcomes 1, 2, 3, and 4. The exam consists of 150 multiple choice questions.

The PLAR candidate is allowed two (2) hours to complete the exam.

The assessor is to determine the date, time, and location of the exam.

BTTM3510 – Database Management

This course provides an introduction to database management theory and practice. It explores the database environment, the database development process, and how this process fits into the broader context of information systems development. Students will be introduced to entity-relationship models, and how to convert a conceptual data model to a relational data model. The course also provides an introduction to SQL.

Credit unit(s): 3

Equivalent course(s): None

Prerequisite(s): None

BTTM3510 -	- Database Management					
Mastery:	I am able to demonstrate it well enough to teach it to someone else.					
Competent	I can work independently to apply the outcome.		¥	_		
Functional:	I need some assistance in using the outcome.	>	Competent	Functional	ng	
Learning:	I am developing skills and knowledge for this area.	Mastery	ωdμ	ğ	Learning	ဉ
None:	I have no experience with the outcome.	Mag	S	Ţ	Lea	None
	Discuss the importance of database management systems and the environment in which database technologies function.					
	 Explain the limitations of conventional file processing systems. 					
	 Describe the advantages, costs, and risks of the database approach. 					
	 Identify the components of a typical database environment. 					
	 Identify categories of databases and key decisions that must be made for each category. 					
2.	Describe the database development process.					
	Describe the life cycle of a systems development project.					
	 Explain the roles of individuals who design, implement, use, and administer databases. 					
	Describe the three-schema architecture for databases.					
	 Explain the role of packaged (or generic) data models in database development. 					
	 Create simple data models that show the scope of a database. 					
	Use an entity-relationship model to document the rules of the business that influence database design.					
	 Describe how to model the rules of an organization (business rules). 					
	 Build an E-R diagram to represent common business situations. 					
	 Compose effective names and definitions for entities, relationships, and attributes.

-	Model different types of relationships.					
	onvert a conceptual data model to a relational data model and uplement basic concepts of normalization.					
•	Explain the relational data model.					
•	Analyze integrity constraints.					
•	Transform an E-R diagram to a logically equivalent set of relations.					
•	Describe the process of normalization.					
•	Implement a Relational Database Example in Microsoft Access.					
	se SQL commands to create and maintain a database and to rite single-table queries.					
•	Use SQL data definition language commands to define a database.					
-	Process single tables by using SQL commands.					
•	Establish referential integrity using SQL.					
6. Us	se SQL DML commands to write multi-table queries.					
•	Explain the concept of transaction integrity, data dictionaries, triggers, and stored procedures.					
•	Compose single and multiple table queries using SQL commands.					
•	Describe three types of join commands and use SQL to implement examples of these commands.					
•	Construct non-correlated and correlated sub queries and know when to use each.					
	Explain how SQL can be used to ensure transaction integrity.					

PLAR assessment methods

If you qualify for PLAR, you may be asked to demonstrate your learning in one or more of the following ways. Be prepared to discuss the expectations during a consultation meeting.

1. Challenge exam

Requirements for challenge exam

The PLAR candidate will successfully complete (70% or >) a challenge exam assessing learning outcomes 1 to 6. The exam consists of both a theoretical and a practical component. The theoretical component consists of multiple choice and short answer questions; the practical component consists of a network topology assignment.

The PLAR candidate is allowed two (2) hours to complete the theoretical component and 1 hour and 15 minutes to complete the practical component.

The assessor is to determine the date, time, and location of the exam.
