Disaster and Emergency Management Pathways

The Disaster and Emergency Management program offers a 2-year and 3.5-year pathway to complete the diploma.

Each pathway has pre-scheduled courses per semester and is organized in cohorts to encourage collaboration and teamwork. With both pathway options, the program is offered fully online and is self-guided, so you can work at your own pace to complete the courses scheduled within each semester. Whether you take the 2-year or 3.5-year pathway, you are considered a full-time student and are eligible for student funding and scholarships.
