

Apex Geomatics is rapidly expanding and we have an exciting opportunity for **Construction Surveyors** to join our Sherwood Park Operations! Multiple positions are available with some being locally based from our Sherwood Park office (travel within a 2-3 hour radius may be required on occasion). Also, we have Fly-in/Fly-out (FIFO) positions available on major projects in Western Canada.

Apex Geomatics has been providing survey and geospatial solutions on major projects throughout Western Canada for the past 20 years. A young, adaptable, forward-thinking group, Apex is committed to aligning our clients with the future of data acquisition and application. A Company built on long-lasting relationships, we seek individuals who share in our vision and embody our core values of Integrity, Precision, Efficiency, Teamwork and Inclusion. Check us out at [www.apexgcs.ca](http://www.apexgcs.ca) to learn more about our growing organization.

### Why join Apex?

Our company strives to not only attract and retain the top professionals in our field but to also train, develop and inspire the new. **We provide an inclusive team-oriented environment that ensures every employee is set up for success. Apex is offering consistent long-term employment, a highly competitive wage structure, ample training and development opportunities, retention bonus, benefits and health spending account, RRSP matching, the list goes on...**

### Essential Responsibilities:

- Manage and perform various field survey tasks independently or with the aid of a Survey Assistant. Senior surveyors will be placed with Junior Surveyors to help train and mentor.
- Inspect, operate and maintain survey equipment and vehicles.
- Prepare and communicate daily field notes, sketches and reports according to job specifications and Apex operational procedures.
- Effective communication and flow of information from field to office.
- Ensure full compliance and active participation in Apex Geomatics' Health and Safety Program.
- Adherence with quality assurance procedures and quality control practices.
- Provide mentorship and training to Junior Surveyors and Survey Assistants.
- Liaise with client representatives to coordinate survey tasks, priorities and deliverables.
- As a representative of Apex Geomatics, you are to conduct yourself with a professional, cordial attitude with clients.
- Other duties as assigned.

**Qualifications:**

- Diploma in Geomatics Technology or equivalent amount of related experience.
- Minimum of 2 years experience as a Surveyor considered an asset, preferably in the construction industry. All students graduating from a Geomatics program will be considered for the position.
- Proficient knowledge and experience with Trimble RTK, Robotic Total Stations and related software. Students with similar training from your program will be considered as sufficient.
- Experience with Civil 3D and Trimble Business Centre are considered an asset.
- Line locating and UAV experience would also be considered an asset.
- Technical competence and a strong attention to detail.
- Excellent communication skills and a proven ability to collaborate with team members.
- Valid Class 5 Driver's License and clean Driver's Abstract.
- CSTS 2020 and WHMIS 2015.
- This is a safety sensitive position and will be subject to pre-assess drug and alcohol screening.
